

South Staffordshire Sexual Health Team

OpenClinic[®]

Important Sexual Health Information for GPs October 2020

Please read the important information below about sexual health services:

! All service users must call the sexual health team on 0300 124 5022 in the first instance, so the most appropriate service option can be offered to them.

! Face-to-face services in clinics will continue to be by appointment only.

! Clinics for Implant/Coil procedures be prioritised for service users who currently have an Implant/Coil in situ – please ensure patients are aware of this before advising them to call the service.

! Some services remain unavailable, the service user will be advised accordingly.

! People aged 16+ can order a free STI testing kit online at sh24.org.uk – patients should be advised of this wherever possible.

! We do **not** offer coils for non-contraceptive reasons, nor routine cervical screening.

! The latest service information on our website openclinic.org.uk.

If you have any questions, please contact the service manager, Vicky Holden on 0300 124 5022.
